H-O is a superior product for the following

A blend of the best obtainable oats is used, giving H-O all the advantages of chemical composition and

The Oats are dried by the old feshioned kiln method, which develope the flavor.

All the advantages which a food product has on account of the cenitary method of preparation are found

4. H-O is not a predigested food, but steam-cooking makes it more readily and completely digestible than catment not so treated. H-O is the only steam-cooked

5. The slogan of The H-O Mille is "Flavor First."
We realize the fact that flavor in food is a highly important factor, not only in its paletability, but what is much more important, its digestibility. It has been repeatedly demonstrated and it is well understood that paletability of a food is a great aid to its digestion.

The superiority in flavor of H-O over other oa

Men Save \$8.50 to \$17.50 on Overcoats and Suits Bought at the **Hackett-Carhart Stores Now**

The critical situation at the Hackett-Carhart stores compels reductions on Highest Grade Men's Winter and Medium Weight Overcoats and Suits that make it possible for men to buy their clothing at prices in most instances lower than wholesale. Wise men are taking advantage of the unprecedented values now effective at the three remaining Hackett-Carhart stores. They are retiring from business and have but a short time in which to close out complete stocks. Before the retirement all bills must be paid and this final sacrifice sale is for the purpose of raising cash, no matter what the cost to the organization.

Edison Service in Large Buildings

The percentage of new large buildings in this city, contracting for full Edison Service during 1913, is in keeping with other recent years, as the following figures show:

1913 .		Adapt	96.9	***
1912		•	97.1	
1911 .			. 96-8	
1910	2 7		97.2	
1909 .	ndir 🚛		. 96.8	

In each instance the merits of other methods were carefully considered, only to find the Edison way more efficient and economical

Operating a private electrical plant, with the ever attendant danger of high-pressure steam and ma-chinery running at high speeds, and the nuisance and responsibility of receiving and storing coal and removing ashes, usually means a higher aggregate cost for light, heat and power

Our experts are always "At Your Service" for unbiased investigations and reports without cost. The results are so simply and clearly stated that they may be readily understood and confirmed, even by one possessing no technical knowledge
